# 2015 OUT-MIGRATION REPORT, FAUNTLEROY CREEK Volunteer monitors Dennis Hinton, Steev Ward, and Pete Droughon 

## SUMMARY

Volunteer monitors documented a total of 35 coho smolts that survived their time in Fauntleroy Creek to migrate out to saltwater habitat in Fauntleroy Cove. All but two of this number were found in the lower trap as the upper trap did not go in until April 29. By casual observation, smolt size appeared to be comparable to past years. Volunteers found 120 release fry that had washed into one of the traps.

| Year | Monitoring Period | Live Smolts Upper | Live Smolts Lower | Dead Smolts | Smolts to Salt | Smolt Size Range (mm) | Live Fry Upper | Live Fry Lower | Dead Fry | Eggs to Schools* | Released Fry |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 2015 | 3/27-5/31 | 2 | 33 | 0 | 35 | --- | 100 |  | 20 | 2,700 | 1,700 |
| 2014 | 3/15-5/31 | 8 | 11 | 0 | 19 | --- | 84 | 0 | 1 | 3,450 | 2,409 |

| 2005 | 3/16-5/27 |  | 10 | 0 | 10 | 100-135 |  | 34 | 3 |  | 1,138 |
| 2004 | 3/3-6/10 |  | 11 | 0 | 11 | 97-123 |  | 569 | 3 |  | 1,534 |
| 2003 | 4/2-6/16 |  | 37 | 0 | 37 |  |  | 637 | 84 |  | 1,254 |

*Does not include any eggs left by spawners

## METHODOLOGY

The two traps are similar: a wooden box fitted with netting and anchored below a weir such that all water flows through, softly trapping everything headed downstream. One was positioned as the creek flows out of Fauntleroy Park (where schoolchildren release their fry) and the other was positioned just upstream of the fish ladder, about a half block before the creek empties into central Puget Sound. The upper trap was in full view of anyone visiting Fenton Glen, at the east end of the Fauntleroy Church parking lot, but we saw no evidence of its being tampered with. We checked the traps daily and (with state permission) transported smolts from the upper trap downstream to ensure their safety. We released all smolts to continue their journey and released fry downstream of where they were caught. To avoid trauma, we did not handle the smolts to get exact measurements.

## COMMENTS

The number of smolts rebounded somewhat from the markedly low number last year. Given that we started seeing smolts right away, the traps could have gone in earlier than late March and might have come out in mid May. Spring came early this year for riparian plants and may have come early, as well, for smolts.

## RELATED EDUCATION

We were able to show some student groups coming for salmon releases a smolt in an aerated bucket to demonstrate growth over one year in the creek
